

GRETCHEN WHITMER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF
ENVIRONMENT, GREAT LAKES, AND ENERGY
KALAMAZOO DISTRICT OFFICE

LIESL EICHLER CLARK
DIRECTOR

May 16, 2019

Ms. Julie VanderWiere
7110 West Q Avenue
Kalamazoo, Michigan 49009

Dear Ms. VanderWiere:

SUBJECT: Michigan Department of Environment, Great Lakes and Energy (EGLE)
Submission Number: HNH-TFMB-YPBP9
Site Name: 39-7244 Bentwood Trail-Kalamazoo

It has come to our attention that Michigan Department of Environmental Quality (MDEQ) Permit Number WRP015489 v. 1 contains an error. Permit condition number 20(c) references a water surface elevation (WSE) at the 12th street culvert over West Fork Portage Creek at the Atwater Mill Pond outlet. Pumping must cease when Water Surface Elevation (WSE) reaches a certain elevation at this culvert. The elevation of the controlling WSE elevations and reference measurements in the permit was incorrect and has been corrected.

Original:

Pumping shall cease and MDEQ notified if WSE reaches...**869.05-feet** at the 7-foot diameter culvert at 12th Street, which is **4.72-feet** below the upstream culvert crown.

Corrected:

Pumping shall cease and EGLE notified if WSE reaches....**870.20-feet** at the 7-foot diameter culvert at 12th Street, which is **3.57-feet** below the upstream culvert crown.

If you have any questions regarding this letter, please contact me at 269-567-3567; haroldsond@michigan.gov; or EGLE, Kalamazoo District Office, 7953 Adobe Road, Kalamazoo, Michigan 49009-5025. Please include Permit No. HNH-TFMB-YPBP9 in your response.

Sincerely,

Derek Haroldson
Kalamazoo District Office
